

DATASHEET

CLICK 'N GO SEDUMTRAY

MATERIAL

The Sempergreen Click 'n go Sedumtray is a container made of recycled Polypropylene (PP). The Sedumtray is cultivated with a minimum of 12 different Sedum species. With each delivery, there are at least 6 to 8 species present. The plants grow on a Sempergreen tray substrate. Sedumtray boast at least 95% coverage upon delivery.

ABOUT THE VEGETATION

The sebaceous Sedum plants are adept at storing water in their leaves and are therefore extremely suitable for varying weather conditions. During the bloom time, the diversity of Sedum species provides nutrition for pollinators like bees and butterflies.

APPLICABILITY

The Click 'n go Sedumtray is a ready-to-use tray that can be applied on roofs with a slope of 0 to 20 degrees. If the roof pitch is more than 10 degrees, we recommend the incorporation of anti-shear measures. The plants are best suited to a location in the sun or partial shade.

DELIVERY AND INSTALLATION

The Click 'n go Sedumtrays can be ordered per piece. We recommend placing the trays in the shade immediately after delivery, and installing them on the roof as soon as possible. On hot days above 25 °C, installation within 24 hours after delivery is essential.

The installation of the Sedumtrays is very simple: the trays can be clicked together. To protect the roofing, we recommend placing a [protective cover](#) underneath the trays. This cover can also absorb 3 l/m² of water.

TECHNICAL DATA

Coverage	95%
Weight when dry	approx. 12 kg/tray, 53 kg/m ²
Saturated weight	approx. 18 kg/tray, 80 kg/m ²
Water buffering capacity	27 l/m ²
Height excl. vegetation	8 cm
Height incl. vegetation	10 - 12 cm
Dimensions	45 x 49.5 cm
<i>For the outer row of trays, please take into account a size of 49.5 x 49.5 cm per tray during installation.</i>	
Trays per m ²	4.4 items
Trays / m ² per pallet	58 items / 13.12 m ²
Dimensions pallet	100 cm x 100 cm
